

Monthly Recap:

The most exciting thing that happened for our ministry in December was an outreach event earlier in the month. Through flood-relief funds that churches and individuals had given us, we were able to take food and supplies to people who are staying at a shelter because they can no longer live in or no longer have homes because of the two recent hurricanes and subsequent flooding. We were able to help a local church in that part of Honduras put on an event to provide the people with some of the things they lost in the floods and share the Gospel with them. From that night, four adults accepted Christ as their personal Savior!

We got the opportunity to travel with the church we are attending to other areas around and outside of the capital city to survey possible locations and ideas for church planting. There are so many communities that have the potential to sustain a national pastor and are in need of a healthy local church; please continue to pray for our efforts, that God would open the doors for a new church plant and national leadership soon, even amongst all these corona virus-related regulations and restrictions.

Please Pray For:

- **Planning and Strategy:** We are facing some special challenges to our original plans but we are still moving forward, these challenges only ensure that God alone will receive the glory for what gets accomplished!
- **Residency Process:** Along with other legal processes, we thank God for the ongoing progress of our residency process. We are still in 'extension-mode' and are looking forward with confidence in obtaining residency. Pre-COVID, this process could take up to four months and we are in month three as of December. So we should see results soon!

Along with 4 adults praying to be saved, our outreach event was able to help many families who have lost everything by replacing some household items. For fun we gave some toys and had pizza as well!

Getting to explore our new country as a family is one of our most treasured blessings. Dreaming about new churches and what God could accomplish is amazing and fun!

Many people beg at the street corners and main intersections, so as a local outreach Ashley and our kids prayed with these families and gave Christmas presents to the kids.
